Human review / decision notes

1. Shape: does it capture the original folded, athletic character? What should be taller, softer or more pronounced?

2. Bronze accents: is the divider broad enough, and are the rims balanced?

3. Texture and lettering: are the tread, stitching, wording and placement right?

4. Closure: is bottom loading with a fixed top the desired experience?

5. Priority: name the three most important changes before the next revision.
